

4th ERA Chemistry "Flash" Conference

"Modern chemical techniques for light harvesting"

9th – 12th November 2008, Euroforum Centre, San Lorenzo de El Escorial, Spain

"Chemical schemes for harvesting light, either for the generation of electricity or for the direct synthesis of energy storage molecules are one of the grand challenges in chemistry".

This flash conference aims to bring together a diverse group of scientists who are working in the broad area of harvesting to discuss recent progress and future challenges.

Scientific Committee:

Nazario Martín *UCM, Spain*
Valentín González *MCI, Spain*
Lucas Hernández *UAM, Spain*

Confirmed Speakers to date include:

Alonso, Jesús	Holloway, Brian
Andersson, Mats	Janssen, René
Bassani, Dario	Korppi-Tommola, Jouko
Berberan-Santos, Mario Nuno	Lemmetyinen, Helge
Coronado, Eugenio	Luque, Antonio
Dyakonov, Vladimir	Martín, Nazario
Echegoyen, Luis	Miranda, Rodolfo
Fernández, Juan Manuel	Nierengarten, Jean-François
Frey, Gitti	Palomares, Emilio
Graetzel, Michael	Torres, Tomás
Guldi, Dirk	Vos, Han
Hadziioannou, Georges	Wuerthner, Frank
